BOSE®

Bose® FreeSpace® 32 loudspeakers

A flush-mount, high-performance loudspeaker engineered for locations with ceilings up to 10 m (30 feet). This 32-watt loudspeaker combines compact size, high-fidelity sound and ease of installation – all in an elegant design.

BUSINESSES HAVE UNIQUE NEEDS

High output, proven reliability and even sound coverage

Lifelike, natural sound at all volume levels

Loudspeakers that integrate easily into your decor

Easy installation with minimal down-time

System components that business owners can rely on

BOSE HAS UNIQUE SOLUTIONS

These loudspeakers are engineered to meet the demands of business settings. At the heart of each loudspeaker is a patented 11.4 cm (4.5") Bose HVC driver, long known for its lifelike sound, high power handling and reliability. This loudspeaker's wide, even dispersion ensures music and pages can be heard clearly throughout your building.

Bose Model 32 loudspeakers deliver full, natural music and clear, intelligible paging. Even at low volume, you hear music the way it was meant to be heard – with deep bass, rich vocals and crisp highs.

The Virtually Invisible® speaker design allows these loudspeakers to blend with almost any decor. The enclosures and grilles are available in white and can be painted to match your interior.

Custom-designed hardware is included and tap settings for 1, 2, 4, 8, 16 and 32 watts are built into each speaker, all to make installation faster and easier than with conventional loudspeakers.

These loudspeakers are engineered and tested for demanding business environments, and are backed by a transferable five-year limited warranty.
