

A premium 32-watt surface-mount loudspeaker engineered for indoor and outdoor commercial spaces.

#### Your business need

High output and lifelike, natural sound at different volumes

Ability to withstand permanent outdoor installation

Easy installation

Easy integration into your decor

System components that business owners can rely on

#### The BOSE® Solution

These loudspeakers are engineered to meet the placement and performance demands of business settings. Each loudspeaker features a patented 11.4 cm BOSE® HVC driver known for lifelike sound, high power handling and reliability. This full-range driver delivers wide, even dispersion so music and paging can be heard more clearly throughout your building.

A weather-resistant driver and environmentally robust materials allow the FreeSpace™ 32SE loudspeaker to deliver exceptional performance in a wide range of weather conditions.

Quick-mounting brackets allow you to mount the loudspeakers horizontally or vertically, increasing your placement options. The angle of the loudspeakers can also be adjusted to enhance sound coverage. Easy-to-change tap settings for 1, 2, 4, 8, 16 and 32 watts are built into each speaker to make installation faster and easier than with many other loudspeakers.

This clean, simple look and compact size allow these loudspeakers to blend with almost any decor. The speakers are available in black or white and can be painted to match your interior.

These loudspeakers are engineered and tested for demanding business environments, indoors and outdoors, and are backed by a transferable five-year limited warranty.
