

A premium high-fidelity speaker system designed for permanent installations. It includes PANARAY® 502®A speakers and the 502®B Acoustimass® enclosure – all engineered to deliver sound comparable to high performance home stereos.

**Your business need**

**The BOSE® Solution**

Quality sound throughout the listening area

Five 11.4 cm (4.5") full-range drivers – engineered specifically for installed professional applications – reproduce sound with the clarity and fullness of the best home hi-fi systems. The patented driver array delivers lifelike music and intelligible speech throughout the space.

Full sound from speakers that are easily integrated into your decor

The PANARAY® 502® loudspeaker system is well-suited for auditoriums, theaters, houses of worship and other facilities where both quality sound and aesthetics are important. The slim loudspeakers provide wide sound coverage while remaining virtually unnoticed. In addition, the 502®B ACOUSTIMASS® enclosure launches pure bass throughout the listening area with no audible distortion, so you can place it almost anywhere, even out of sight. The loudspeakers and enclosure come in professional grey or arctic white and can be painted to match your interior.

Quality sound for voice and music

The PANARAY® 502® system uses active equalisation to maintain the proper balance of all frequencies. Both music and voice reproduction sound equally good.

A complete line of accessories for easy installation

Optional hardware engineered specifically for professional applications makes system installation fast, easy and cost-effective.

Reliable performance

BOSE® full-range drivers make PANARAY® 502® loudspeakers more reliable than conventional speakers whose small, separate tweeters are often unable to handle the high power and extended use required for professional applications. PANARAY® 502® loudspeakers are backed by a transferable five-year limited warranty.
